

# **“About 3D Volumetric Displays”**

**Dr Barry G Blundell**

**[www.walker-and-wood.com](http://www.walker-and-wood.com)**

## **~Contents~**

### **1. INTRODUCTORY**

Volumetric Displays. Image Space. Anisotropic Magnification. Anisotropic Propagation. Voluminous Data: Voxels. Uniformity Issues. Image Voxel Clusters. Temporal Considerations. Forms of Image Space. Discussion.

### **2. EXEMPLAR CHARACTERISTICS**

Classification. Perspective and Physical Spaces. Pictorial Cues to Depth. Oculomotor Cues to Depth. Parallax Cues to Depth. Viewing Freedom. Quantisation in the Third Dimension. Discussion.

### **3. SUBSYSTEMS**

Key Elements. Voxel Generation Subsystem. Voxel Activation Subsystem. Conditional Voxel Activation. Primary Image Space Formation Subsystem. Discussion.

### **4. TRANSLATIONAL MOTION**

The Technique. Surface of Emission. Translational Motion. Displacement Profile. Beam Deflection Angles. Image refresh Frequency. Acoustic Noise. Discussion.

### **5. ROTATIONAL MOTION**

Background. Use of an Active SOE. Image Refresh Frequency. Screen Transparency. Multi-Colour Voxels. Number of Image Slices. Voxel Bandwidth. Sector-Free Approach. Data Throughput. Optical Projection. Directed Beam Techniques. Planar Screen Geometry. Exhaustive Scanning. Dot Graphics. Image Slices and the Fill Factor. Image Slices: Temporal Issues. Optimisation. Variability in Voxel Activation Capacity. Beam Deflection Angles. Helical Screen. Other Screen Configurations. Rotation of a 3D Structure. Discussion.

## **6. STATIC-VOLUME PARADIGM**

The Technique. Stepwise Excitation of Fluorescence. Rate Equations for an Elementary Model. Temporal Considerations. Metal Vapours. Rubidium Vapour. An Indicative Estimate of Light Output. Conversion Efficiency Parameter. Use of a Non-Gaseous Medium. Dispersed Phosphor Particles. ZBLAN Doped with Rare Earth Lanthanides. Two-Photon Absorption. Beam Intersection Modalities. Continuous and Quantised Techniques. Opaque Image Voxels. Discussion.

## **7. MULTI-PLANAR APPROACHES**

Terminology. Swept and Static-Volume Approaches. Quantisation in Depth. Stacking LCD Panels. 3D Array of Light Scattering Elements. Related Approaches. Discussion.

## **8. DEAD ZONES**

Terminology. Impact of Dead Zones. Dead Zone Summary. Visual Dead Zone. Dead Zone Formation. Scaling the Visual Dead Zone. Distortional Dead Zone. Voxel Placement Dead Zone. Shadowing Dead Zone. Dead Image Space. Discussion.

## **9. ETHEREAL AND HYBRID TECHNIQUES**

Ethereal Image Formation: Origins. Type I Ethereal Image Space. Type II Ethereal Image Space. Sequential Activation. Activation on Availability. Ethereal Image Space using Depth Planes. Hybrid Volumetric-Multiview Techniques. Discussion.

## **10. DATA FLOW AND CLOSING REMARKS**

Sequential Voxel Activation. Parallelism in Voxel Activation. Image Subspace. Subspace Mappings. Subspace: Temporal Considerations. Effective Image Space Volume. Closing Remarks.
